

National Construction Sector Strike

Last 2 hours of every shift at all sites

Wednesday, 21 February 2024

Against deaths at work, resulting from the use of unqualified companies and endless chains of contracts and subcontracts.

Against deaths at work, resulting from the lack of rules, failure to respect working hours, disregard for fair collective agreements, maximum discounts on labor and safety costs, too many false VAT numbers and the exploitation of pieceworkers.

Against deaths at work, resulting from the lack of controls and the insufficient resources allocated to inspectors, local health authorities, and the police.

Against deaths at work, resulting from the failure to implement the points-based license, impunity for those who make mistakes, and the absence of a crime of murder at work.

No more maximum discounts, ***no more*** endless chains of subcontractors, ***no more*** illegal work and contract dumping.

We want maximum protection for all construction sites, public and private, ***we want*** a system that qualifies companies and stops the crooks and profiteers.

We want dignity for everyone!
